

Transforming autism fitness management and administrative tasks

Wonder Fitness Center in Bahrain provides a safe and inclusive environment for individuals with autism, helping them overcome physical activity challenges.

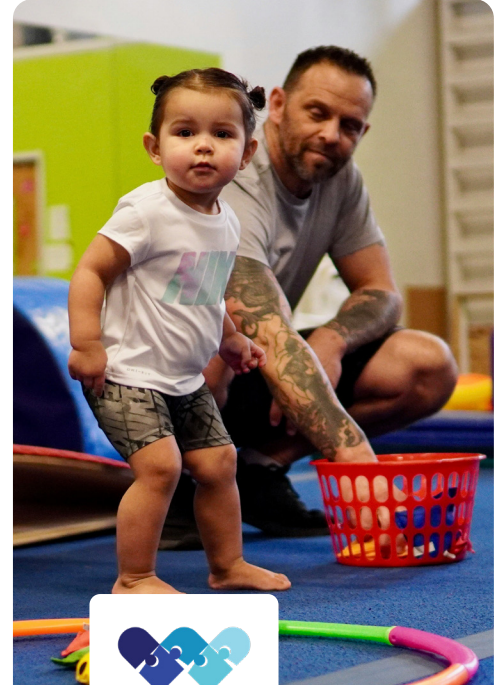

As the first facility of its kind in the region, it is an essential resource for affected families. Wonder Fitness Center faced significant issues before implementing Odoo, including time-consuming and error-prone progress tracking during training sessions and manual administrative work for sales orders, invoices, and accounting.

Saving 80% of data collection time

Wonder Fitness Center had to manually document each individual's progress during training sessions, making the process complicated and time-consuming.

But with the new “Fitness Management” app, created specifically based on the center's requirements, users can easily record activity details through their phone or website, saving 80% of their data collection time. The app also allows trainers to generate progress reports based on various factors such as sessions, groups of exercises, specific exercises, or a selected timeline, enabling them to propose the best training options for each individual.

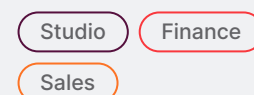

Moreover, Wonder Fitness Center had to manually create sale orders, send invoices, and track accounting tasks, which were both time-consuming and prone to human error. With the help of Odoo's solutions, these tasks were automated, saving significant time and effort while minimizing the risk of mistakes. The automated sales order management and subscriptions application made it easy to track subscription expiration dates without manual work, and the invoicing process is now simplified, allowing users to generate invoices from subscriptions automatically. All the applications are integrated with the accounting app, streamlining the entire process and providing users with accurate and up-to-date information anytime.

Efficient, effective, and reliable operations

Wonder Fitness Center has experienced a significant transformation since implementing Odoo's solutions. The center's progress-tracking and administrative tasks have been simplified, resulting in a more efficient, effective, and reliable operation. Integrating Odoo's solutions has revolutionized the way Wonder Fitness Center operates, enabling trainers to propose the best exercise and activity options for each individual while saving significant amounts of time and effort on administrative tasks.
